

SG360° Announces Plans to Expand Finishing Operations

WHEELING, Ill., October 29, 2019 – SG360° is pleased to announce plans to expand the physical footprint of our existing Wheeling finishing operations by 25-30 percent to create a state-of-the art combined digital printing and finishing facility for our customers. We are starting the evaluation now and expect to execute the planned expansion in the first quarter of 2020.

Our goal is to have our digital printing and finishing assets co-located in one facility. We are evaluating several options, including expanding our footprint near our main campus in Wheeling or opening an entirely new site. Regardless of the location that is ultimately chosen, these plans include the consolidation of our Bolingbrook operations into the new facility.

Co-location of SG360°'s digital printing and finishing assets will further reduce the cycle time of our customers' direct marketing materials from "concept to mailbox," while offering expanded product designs via a wider breadth of printing and finishing capabilities.

The combination of faster cycle times and broader product offerings will enhance both the effectiveness and the return on investment of our customer's direct marketing initiatives.

ABOUT SG360°

SG360° is an industry-leading printing and direct marketing services provider that offers a full range of design, print, finishing, mailing and freight services across a coordinated ecosystem of facilities at scale. Headquartered in Wheeling, Ill., it is owned by private equity firm ICV Partners, a certified MBE. Besides Wheeling, it has five additional facilities in the Chicagoland area as well as locations in California, Florida, Minnesota, New Jersey, New York, North Carolina, Ohio, Pennsylvania, and Texas. More information is available at www.sg360.com.
